# Preface

## P.1 Purpose

a. This NPR sets forth the retention periods of Federal records of the National Aeronautics and Space Administration (NASA). This revised edition has been correlated with the Agency Filing Scheme (Appendix A), which is the filing scheme for NASA, and the General Records Schedules (GRS) produced by the National Archives and Records Administration (NARA). The scope includes Privacy Act Systems of Records and record series previously omitted. Guidance has been provided in the areas of records retirements, transfers, and retrievals from Federal Records Centers (FRC), and disposal actions. Included are procedures for making changes to these schedules by addition of new items or revisions of current items.

b. The NASA Records Retention Schedules (NRRS) are a controlled publication and are revised continuously by record series title and item number changes. The most current approved version of this NPR is in the NASA Online Directives Information System (NODIS).

## P.2 Applicability

The procedures and guidelines contained in this NPR are applicable to NASA Headquarters and NASA Centers, including component facilities, the Jet Propulsion Laboratory, and other contractors to the extent specified in their contracts.

## P.3 Authority

- a. 36 CFR, Chapter XII -- National Archives and Records Administration, Subchapter B -- Records Management.
- b. 44 U.S.C., Chapters 29, 31, 33.

# Introduction

## I.1 Records Management Required

All Federal employees are required by law and Agency policy to maintain and preserve records. Federal Regulations 36 CFR Part 1220 and 1222, along with NASA Policy Directive (NPD) 1440.6F, NASA Records Management, state the requirement. The heads of Federal agencies are responsible for preventing any unlawful alienation, alteration, removal, or any accidental or unauthorized destruction of records, including all forms of mutilations. In addition, they are responsible for ensuring that all employees are aware of these provisions in the law and that any such action be reported to them or the Agency Records Officer.

## I.2 Records Defined

The statutory definition of Federal records is contained in 44 U.S.C. Section 3301 and is referred to in the National Archives and Records Administration (NARA) Regulations: 36 CFR Part 1220.14 and 1222.12. The Definition of Federal records in 44 U.S.C. Section 3301 is--

As used in this chapter, "records" includes all books, papers, maps, photographs, machine readable materials, or other documentary materials, regardless of physical form or characteristics, made or received by an Agency of the United States Government under Federal law or in connection with the transaction of public business and preserved or appropriate for preservation by that Agency or its legitimate successor as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the Government or because of the informational value of data in them. Library and museum material made or acquired and preserved solely for reference or exhibition purposes, extra copies of documents preserved only for convenience of reference, and stocks of publications and of processed documents are not included.

### a. Federal Record and Nonrecord Differentiated

Each person needs to determine if material (e.g., book, papers, documents, records) is "record" or "nonrecord."

(1) "Nonrecord materials are those Federally owned informational materials that do not meet the statutory definition of records (44 U.S.C. Section 3301) or that have been excluded from coverage by the definition. Excluded materials are extra copies of documents kept only for reference, stocks of publications and processed documents, and library or museum materials intended solely for reference or exhibit." (36 CFR1220.14)

(2) Documentary materials are records when they meet both of the following conditions.

(i) They are made or received by an agency of the United States Government under Federal law or in connection with the transaction of agency business; and (ii) They are preserved or are appropriate for preservation as evidence of agency organization and activities or because of the value of the information they contain.

(3) Some nonrecord examples are vendor catalogs and trade journals, copies of agency directives maintained by other than the issuing component(s) of the agency, a letter received by an employee concerning his/her personal business.

### b. "Permanent" and "Temporary" Federal Records Differentiated

(1) Permanent record means any Federal record that has been determined by NARA to have sufficient value to warrant its preservation in the National Archives of the United States. Permanent records include all records accessioned by NARA into the National Archives of the United States and those for which the disposition is permanent as approved by NARA via a Standard Form (SF) 115, Request for Records Disposition Authority. Permanent records are those appraised by NARA as having sufficient historical or other value to warrant continued preservation by the Federal Government beyond the time they are needed for administrative, legal or fiscal purposes.

(2) A temporary record is any record which has been determined by the Archivist of the United States to have insufficient value (on the basis of current standards) to warrant its preservation by the National Archives of the United

States. Temporary records are approved by NARA for disposal, either immediately or after a specified retention period. NARA determination may take two forms.

- (i) A series of records designated as disposable in an Agency records disposition schedule approved by NARA (via SF 115); or
- (ii) A series of records designated as disposable in a NARA General Records Schedule (GRS).

NOTE: Procedures in this NPR and the dispositions set forth are not applicable to library materials or reference documents normally housed in libraries. Such materials, contained in a library, are considered to be nonrecord.

## I.3 NASA Records Retention Schedules

The NASA Records Retention Schedules (NRRS) are divided into the following 10 subject categories, which are correlated, to the Agency Filing Scheme (AFS).

- Organization and Administrative
- Legal and Technical
- Human Resources - Personnel
- Property and Supply
- Industrial Relations and Procurement
- Transportation
- Program Formulation
- Program Management
- Financial Management and Inspector General
- Common Records

Schedule 1, "Organization and Administrative Records" and, Schedule 10, "Miscellaneous Records Common to Most Offices," will be used by all offices. Schedules 2 through 9 will be used according to office function/operation. The schedules are arranged into four separate, distinct, columns:

<u>AFS #</u>	<u>ITEM</u>	<u>SUBJECT AREA OR RECORD TITLE</u> <u>DESCRIPTION OF RECORDS SERIES</u>	<u>RETENTION</u> <u>&lt;Authority&gt;</u>
COLUMN ONE		AFS # is the number for the Subject Area in column three. This column will also show the AFS # for the Record Series described in column three.	
COLUMN TWO		ITEM is a reference number given to the series of records descriptions in the third column. These numbers are used when completing SF 135, Records Transmittal and Receipt, for transferring records to a Federal Records Center (FRC).	
COLUMN THREE		DESCRIPTION OF RECORD SERIES identifies each category and series of records. The Office of Primary Responsibility (OPR) is also indicated along with specific center instructions, if necessary.	
COLUMN FOUR		RETENTION indicates the required period of time the records must be maintained by NASA and by the FRC's. Authority provides the NARA Job Number that approved the disposition and retention for the Records Series described. NOTE: the statement "RETIRE TO FRC" can be interpreted as "MAY RETIRE TO FRC OR APPROVED FACILITY." The Center Records Manager approves the storage Facility.	

## I.4 Managing Federal Records

It should be understood that NASA, as a Federal Agency, is responsible for managing its records, subject to statutory and regulatory restraints. Good records management requires that as soon as records are no longer needed, archival needs must be recognized and the NASA installation records management program must be followed to ensure that records are appraised, transferred, and disposed of efficiently and economically.

a. Two major record categories.

All Agency records (Federal Records) fall into one of two categories as follows:

(1) Administrative Records

These records document administrative functions common to all agencies, regardless of Agency programs, such as personnel, payroll activities, supply and procurement, space, and communications management. Also, they may be involved in General Accounting Office (GAO) audits of accountable officers' accounts when they shed additional light on collection and disbursement transactions or are part of the "audit trail." For example, in an Agency industrial activity, time cards may be used to examine questionable payroll transactions. Administrative records may also be involved in GAO audits that relate to larger Agency programs or administrative activities.

(2) Program Records

These records reflect the substantive missions and programs of the Agency consisting of standard internal management controls, including those relating to policies, organization, duties, functions, planning, procedures, information systems, and expenditure controls. These records also relate to specific activities carried out by the Agency, such as "Mission" records that relate to decisions about the Space Shuttle program and its operations.

b. Cutoff

The cutoff date is an important part of the retention period because it is the date of the record or document that starts the calculation of the retention period. It is the date to use to start calculating the disposal period (years, months, days). Breaking or ending files at regular intervals, usually at the close of a fiscal or calendar year or date of an action, permits their disposal or transfer in complete blocks and, for correspondences files, facilitates the establishment of new files. Case files are generally cut off at the end of the year in which the case is closed. Cutoff is sometimes referred to as file cutoff or file break.

c. Records disposition

Inactive records, which have a long retention time, can be transferred to a FRC for safekeeping. Material will be transferred to installation staging areas, if appropriate, and ultimately to the FRC in accordance with the procedures and instructions set forth at each Center. Medium requiring special conditions, i.e., temperature, humidity, or handling, does not need to go to a staging area prior to shipment if such area will compromise the special conditions required.

d. Retention deviations

The "RETENTION" period shown in the Schedules for a record or series of records is the approved retention period that NASA has received from NARA. If your records need to be kept longer or need to be destroyed sooner than the retention period authorized, you must contact your Center Records Manager (RM) to discuss the requirements for an exception to the authorized retention period. There is no standard procedure for requesting an exception. The Center RM will need to assist you.

## **I.5 Making Changes to the NRRS:**

Occasionally the creation of new record types and changes to current record descriptions and retention periods occurs. When this occurs, NPR 1441.1 needs to be updated. Updates need to be made to the NPR quickly and as often as needed to keep the NPR accurate in providing guidance to the Agency's personnel. To facilitate the timely updating of the NPR, a process of submitting and reviewing proposed schedules that does not utilize the full Directives Management System review and approval process for each change will be followed. The steps below describe this process and identify the actions and action officer for each step. After the proposed schedules pass the review process, an update entry will be made to NPR 1441.1 including an entry in the Change History log. It should be noted that periodically the complete NPR will be submitted and processed through the full Directives review process for formal approval.

### NRRS Change Proposal Process

This process should be followed when a record or records series cannot be identified in either NPR 1441.1, as revised, or the NARA GRS. Records of this nature are considered "unscheduled." Unscheduled records stay in the unscheduled state until approval from NARA is granted. Unscheduled records are managed as though "Permanent," meaning they cannot be destroyed until NARA has appraised them and a new schedule has been established.

When the Record Owner determines that a type or series of records either does not exist in this NPR or needs modification, the Record Owner is to contact the NASA Center RM to help develop a proposed schedule for the records. The RM will assist the Record Owner in completing a NASA Form 1418.

All proposed changes and recommendations must be submitted on NASA Form (NF) 1418, Proposed Change to NASA Records Retention Schedules, through the Installation Records Manager to the NASA Records Officer, NASA Headquarters. See Figure 1 for example; use current version of form for submittal.

Each Center may have its own supplemental procedures for developing proposed schedules, but should at least follow the steps below.

Step	Action Officer	Action
1	Record Owner	Coordinate with Center Records Manager to develop the proposal to either revise an existing schedule or create a new schedule. This includes determining the functions and activities documented by the records to be scheduled, developing an inventory of the records including a description of the records, informational content, their use, medium, location, volume and inclusive dates. In addition, evaluate the period of time the Agency requires use of each specific record series or system by reference to its uses and value to operations or legal obligations. Based on Agency needs, formulate specific recommended disposition instructions for each record series or each part of an automated information system. Include file breaks, retention periods including length of time to retain onsite, instructions for retirement of records to a FRC, when appropriate, retention period before destruction of temporary records or transfer of permanent records to the National Archives. Recommend retention periods taking into account the rights of the Government and the rights of those directly affected by Agency actions. The above information is used to submit a NASA Form 1418 with supplemental attachments, if necessary.
2	Record Owner	Submit NASA Form (NF) 1418 to the Center Records Manager for review and approval.
3	Center Records Manager (RM)	Review the NF1418. This review includes checking the GRS for an already established retention schedule appropriate for the records. RM should also coordinate all proposed changes with other officials and offices creating and maintaining similar records at the Center.
4	Center RM	If a GRS schedule exists, notify the Record Owner and determine whether the current retention period is adequate for the records.

5	Center RM	If a GRS schedule does not exist or is inadequate for Agency needs, coordinate a review of the proposed change to the NRRS by the Center Chief Counsel or legal organization.
6	Center RM	If the proposal is disapproved, the Center RM notifies the Record Owner and works with the Record Owner to correct the problem.
7	Center RM	If the proposal is approved, forward the completed NF1418 and any attachments to the other Center RM(s) for review and comments (3-4 week review period).
8	Other RM(s)	Each Center RM should determine if the records described in the proposal are applicable to that Center. If they are, that RM should have the appropriate organization review and provide comment on the proposal.
9	Originat-ing Center RM	Consolidate all Center comments into one response and send to the NASA Records Officer with the completed NF1418 and attachments. If a Center has no comments, a "no comments" notice will be included in the package.
10	NASA Records Officer	Review the proposal, making any modifications needed based on current NARA and/or Government Accounting Office general guidance.
11	NASA Records Officer	Send the revised schedule to the Headquarters General Counsel Office for review.
12	HQS General Counsel Office	Review proposed schedule and submit comments to the NASA Records Office. If the General Counsel has no comments, a "no comments" reply should be sent to the NASA Records Officer.
13	NASA Records Officer	Disposition comments, if any, and finalize the schedule, complete Standard Form 115, and forward the package to NARA for review and approval.
14	NASA Records Officer	While NARA is reviewing the proposed schedule, the NASA Records Officer will add the proposed schedule, as a change to NPR 1441.1 with a "Handle as Permanent Pending Retention Approval" label on the records series. Adding the proposed schedule to NPR 1441.1 indicate to NASA personnel that the series of records has been identified, that the record disposition or retention is awaiting approval (records cannot be destroyed), and (with Center RM approval) the records may be sent to an FRC for storage as unscheduled records. In addition, the entry to the NPR will act as a reminder for the NASA Records Officer of schedules that are at NARA for review, facilitating periodic follow up with NARA.

15	NASA Records Officer	If the proposed schedule is a modification to the Retention area of a current approved schedule the Records Officer may leave the current approved schedule in NPR 1441.1 until the new modified schedule is reviewed by NARA. Or the Records Officer may replace the current schedule with the proposed schedule as a change to NPR 1441.1 with a "Handle as Permanent Pending Retention Approval" label on the records series.
16	NARA	Review the proposed schedule and either approve or disapprove it.
17	NASA Records Officer	If NARA disapproves the proposed schedule, work with NARA and submitting Center to make necessary modifications to obtain NARA approval. Coordinate any additional NASA reviews required because of the changes.
18	NASA Records Officer	Upon NARA approval of the proposed schedule, replace the "Handle As Permanent Pending Retention Approval" label with approved retention. Provide notice of NARA approval to all Center Records Managers. Update the NPR Change History page accordingly. The updated NPR does not have to go through the full NODIS approval process at this time.
19	NASA Records Officer	If the schedule approved by NARA, was a modification to an existing approved schedule, the Records Officer will replace the current schedule with the new version approved by NARA and update the Change History page. The updated NPR does not have to go through the full NODIS approval process at this time.
20	NASA Records Officer	Every 2 years, analyze NPR 1441.1 to determine the number of updated/new record series changes to the NPR. If more than 50 have been made, submit a revision to NPR 1441.1 for formal processing and approval. At a minimum, a submit a revised NPR for formal approval every 10 years.

Submit proposed changes and recommendations on NASA Form 1418, Proposed Change to NASA Records Retention Schedules, through the Center Records Manager who will forward it to the NASA Records Officer, NASA Headquarters. See Figure 1 for example; use current version of form for submittal.

## I.6 Retiring Records

### a. When to retire records

Inactive or semi active records that have a minimum retention period of at least 3 years should be retired. Files referred to not more than once a month are considered to be inactive and should be retired to less expensive storage space at either a center staging area, if available, or to one of the approved FRC. NOTE: Transitory or nonrecords items cannot be retired to an FRC.

### b. Starting the process

Contact the Center RM who will assist in the preparation of the necessary paperwork, i.e., center forms, SF 135, SF 115. The required form will be completed for every group of records retired to staging areas, FRC's, another centers, another Federal Agency, and for records transferred directly to the NARA.

Sufficient copies of the appropriate forms will be made to meet local, shipping, and FRC/NARA requirements. One copy of all SF 135's documenting permanent records will be forwarded to the NASA Records Officer. SF 135's sent to the NASA Records Officer must include the Accession Number and the records group number. [See Figure 2 for sample SF 135 for NASA Headquarters.]

Note that the only record that NASA retains to describe records either retired or transferred to an FRC or NARA is the SF 135 and SF 115 [See Figure 3]. This document is vital to retrieving documents/materials at a later time. The records must be accurately and adequately described on the SF 135/115 to ensure proper scheduling and potential retrieval.

### c. Packing instructions

Records are retired in special record boxes, each holding approximately one cubic foot, and may be obtained through the Center RM. Boxes will accommodate letter or legal sized material. There are special boxes which will accommodate magnetic tapes, microfiche, or flat drawings, see your Center RM for these boxes. Boxes other than records boxes cannot be used because of shelving restrictions and specifications at FRC's.

#### d. Basic guidance

Before any efforts are undertaken to retire records, contact the Center RM for instructions and assistance.

##### (1) Preparing records for transfer:

(i) Remove all nonrecord material and extra copies;

(ii) Separate records into appropriate series/collections. A series is "a block of records having the same disposition authority and date." Each item or sub item in this schedule represents a series.

(iii) Retire each series as a separate accession. Mixed series are not to be accepted without an approved exception letter generated by the NASA Records Officer. Accessions must consist of at least one box.

##### (2) Packing records:

(i) Use the proper size box when packing records. Consult the Center RM for boxes.

(ii) Follow assembly instructions provided with boxes. Leave approximately one inch of space in each box for working with the files more if additional files will be added later. Send only completed or closed files. This prevents separation of file documentation and reduces the amount of vacant space in the box. Leave all guides and tabs in the records if they will assist FRC staff in servicing or retrieving the records.

(iii) Do not overpack boxes. NEVER place records/material on the bottom, side, or on top, of other records in the box. NOTE: FRC's will not accept boxes that are not full or padded. This prevents records from sliding or falling out of folders during shipment.

(iv) Pack records, in existing file arrangement, in the box with the folders in an upright position.

(v) Do not seal the boxes with tape. Fold flaps as instructed.

### (3) Labeling and shipping

(i) After receipt of an approved SF 135 by the Center Records manager, the Accession Number given is written on the upper left corner of each box in the accession.

(ii) The Agency box number is written on the upper right corner, beginning with Box Number 1 and includes the total number of boxes in the accession (see Labeling and Box Markings for Shipment figure).

(iii) Do not use labels to supply additional information. Accession numbers and box number must be written directly onto the box with a felt tip marker.

(iv) Center RM will arrange for shipment within 90 days after receipt of the approved SF 135. If retirement cannot be made within this period, contact the RM. Unexplained delays of more than 90 days will result in the FRC canceling the accession number and returning the SF 135. The entire approval process will have to be started over. This requires the resubmission of paperwork, obtaining approval for shipment and renumbering the boxes with a new accession number.

### Labeling and Box Markings for Shipment

#### (4) Restrictions

SECRET and CONFIDENTIAL records, coming under the General Declassification Schedule, can and should be retired to FRC's whenever the records are eligible.

TOP SECRET or EXEMPT records from the General Declassification Schedule are NOT eligible for retirement.

CLASSIFIED material may not be retired mixed with unclassified material. Folders or records containing classified material must be segregated from those containing unclassified material and must be retired in separate boxes under different accession numbers.

Consult Chapter 4 of NPR 1620.1A, Security Procedures and Guidelines for minimum standards, procedures, specifications, and guidelines for the protection of classified information in NASA's possession.

#### \* Accessioning Security Classified Records:

a. When the SF 135 is filled out, Item 1 will show the highest level of classification of any of the records in any box included in the accession.

b. In the column "Description of Records with Inclusive Dates," the following certification will be typed and signed by the head of the office retiring the records:

This certifies that the records in this accession are subject to the General Declassification Schedule, and all automatic downgrading actions possible have been taken and the documents re marked accordingly. Based on the most recent date of publication of the highest classified document in this accession, all of the

contents of the boxes become unclassified on December 31, XXXX.

-----  
Typed name and signature of Office Head or authorized designee.

c. Care must be taken in describing classified records on the SF 135 to be sure to exclude classified information from the description.

#### (5) Retrieval

Records can be retrieved from both Center staging areas and FRCs. Requests should be made by completing Optional Form 11 (OF 11), Reference Request Federal Records Center [see Figure 4].

When completing an OF 11, provide complete delivery information, your name and telephone number, building name, and street address. Always furnish the accession number, Agency box number, location (if known), and the nature of the service, i.e., temporary withdrawal, search, permanent withdrawal. The original copy of the OF 11 is used to service the request and the last copy is used to charge out the records. This middle copy is used as a suspense copy for the Agency, except when the records are security classified. NOTE: Records classified "Secret" or higher, the Agency will send all copies of the OF-11 and will retain a photocopy of the form for suspense purposes.

Boxes or individual folders (if properly identified) may be obtained. Use a separate OF 11 for each folder or box requested from a different accession. Two or more contiguous items, folders, or boxes, however, may be treated as one item and requested on one OF 11.

If records are being requested under the provisions of the Freedom of Information Act or the Privacy Act, make a notation to that effect in the "Remarks" section of the OF 11 to ensure priority handling and immediate return.

Any records withdrawn from an FRC should be returned. When boxes or records are withdrawn, all folders should be refiled in their proper place in the boxes before being returned. The borrower is responsible for returning the records as soon as they are no longer needed. If records (boxes or folders) are withdrawn and are not to be returned, the borrower must notify the Center RM, who will so notify the FRC, so that records can be annotated that it is a "permanent" withdrawal. This permits the FRC to reuse shelf space if the withdrawal involves boxes.

## I.7 Electronic Records

a. Electronic records are electronically recorded data (including e-mail), or paper records converted, that meet both of the following conditions are Federal records and must be scheduled and cared for appropriately:

- (1) They are made or received by NASA under Federal law or in connection with the transaction of public business; and,
- (2) They are preserved or appropriate for preservation as evidence of NASA's activities or because of the value of the information they contain. The same policies and procedures that apply to other record mediums also apply to electronic records with a few exceptions. These exceptions are based on the need to have information about the system, the media being used, and the data being acquired.

b. Electronic records are those records stored in a form that only a computer can process. Also called machine readable.

c. Electronic record systems are those information systems that produce, process, or store records by using a computer.

d. Electronic records shall be scheduled, managed and dispositioned in accordance with approved retention schedules, just as any other record.

e. More specific policy, procedures and guidelines for identifying and managing electronic records are under development by the Office of the NASA Chief Information Officer.

# CHAPTER 1. NRRS 1

## ORGANIZATION AND ADMINISTRATIVE RECORDS

This records schedule is one of a series of schedules, approved by the Archivist of the United States, which furnishes authoritative instructions for the retention, destruction, or retirement of records held by NASA Centers or other offices.

This schedule grants continuing authority for the disposition of records already accumulated or to be accumulated in the future.

The records described in Schedule 1 are the general, management, and administrative types of records essential to ordinary office operations but distinct from the records of functional activities as set forth in other NASA Records Retention Schedules. Some of the records categorized and listed are found only in offices at the upper management levels; others are found at almost every organizational level. Offices with functional management responsibilities will usually need to consult at least one other schedule, in addition to NRRS 1, in order to effectively control the disposition of their records.

## Chapter 2. NRRS 2

### Legal and Technical Records

This records schedule is one of a series of schedules, approved by the Archivist of the United States, which furnishes authoritative instructions for the retention, destruction, or retirement of records held by NASA Centers or other offices.

This schedule grants continuing authority for the disposition of records already accumulated or to be accumulated in the future.

#### LEGAL

The records described in Schedule 2 pertain to the management and operation of NASA's legal and patent functions. They are created and accumulated by organizations that have management control or formulate and prescribe legal or patent policies and procedures and by activities and offices applying these procedures. This schedule describes the pertinent categories and specifies the retention period and dispositions for each.

#### TECHNICAL

In addition, Schedule 2 also includes records that pertain to the management and operation of NASA's scientific and technical information programs, including the technology utilization offices. These records include the published formal series of scientific and technical information, the routine operating procedures which include sending the contracting officer a copy of all correspondence with the contractor pertaining to contract administration, and the patent counsel copies of reportable items and data, and all correspondence relevant to innovations and potentially patentable inventions.

## Chapter 3. NRRS 3

### Human Resources (Personnel) Records

This records schedule is one of a series of schedules, approved by the Archivist of the United States, which furnishes authoritative instructions for the retention, destruction, or retirement of records held by NASA Centers or other offices. This schedule grants continuing authority for the disposition of records already accumulated or to be accumulated in the future.

The records described in Schedule 3 pertain to the management and operation of NASA personnel functions. These records relate to the supervision over and management of Federal civilian employees. This schedule covers the disposition of all official personnel folders of civilian employees and other records relating to civilian personnel, wherever located in the Agency. However, records such as the Official Personnel Folders, employee performance records, and the Employee Medical Folders, are maintained according to OPM's Guide to Personnel Recordkeeping (Operating Manual 293-31), which takes precedence over any provisions of this schedule which may be in conflict therewith. This OPM guide prescribes a system of recordkeeping for certain Federal personnel records.

With the exception of electronic records created in central data processing facilities described above, all records described in this schedule are authorized for disposal in both hard copy and electronic forms, under NASA Schedule 2, for General Record Categories, other NASA schedules as appropriate depending on record series, and, NASA Schedule 10, Records Common to Most Offices.

## Chapter 5. NRRS 5

### Industry Relations and Procurement

This records schedule is one of a series of schedules, approved by the Archivist of the United States, which furnishes authoritative instructions for the retention, destruction, or retirement of records held by NASA Centers or other offices. This schedule grants continuing authority for the disposition of records already accumulated or to be accumulated in the future.

The records described in Schedule 5 pertain to the management and operation of NASA procurement and contracting functions. They are created and accumulated by organizations that have management control or formulate and prescribe procurement policies and procedures and by activities and offices applying these procedures. The schedule describes the pertinent records categories and specifies the retention period and disposition for each.

Agency procurement records document the acquisition of goods and nonpersonal services, reporting procurement needs, and related matters which are a part of daily procurement operations. The basic procurement files reflect a considerable range of procedures, from simple, small purchases to complicated prime contractor and subcontractor operations. Records created prior to 1958 must be offered to NARA for appraisal before applying the disposition instructions. All agencies have official contract files, which contain a minimum core of specified documents, but there are also other documents that vary in accordance with what each agency deems to be best for its own operating purposes. All of these documents make up the official file copy.

The key procurement file is the transaction case file containing the formal contract or informal purchase order or lease instruments and all related papers. The documents flowing into the file differ in detail, but they include, in addition to the purchase document, specifications, bids, schedules of delivery, initiating requisition, invoices, and correspondence. Other copies of these documents, made for expediting and other administrative purposes, are scattered throughout the inspection, shipping expediting, and other units of the agency procurement organization and are not considered a part of the official file. Other files related to procurement are the special documents referred to as title papers which document the acquisition of real property (by purchase, condemnation, donation, exchange or otherwise) these records are handled under Schedule 8 of this handbook.

This schedule also includes some of the records relating to grant programs. Since grant programs document projects contracted between this Agency and an outside party, these records are included as an adjunct to the procurement records.

## Chapter 6. NRRS 6

### Transportation

This records schedule is one of a series of schedules, approved by the Archivist of the United States, which furnishes authoritative instructions for the retention, destruction, or retirement of records held by NASA Centers or other offices. This schedule grants continuing authority for the disposition of records already accumulated or to be accumulated in the future.

The records described in this schedule pertain to the movement of goods and persons under Government orders. The records include bills of lading, transportation requests, vouchers, and similar records, including those prescribed by Title 5 of the General Accounting Office Policy and Procedures Manual. Copies of some of these records used to support payments become a part of the accountable officers' accounts, or are accounting posting media. Their disposition and description may be covered by NASA Records Retention Schedule 9.

#### Movement of Goods

The key record is the bill of lading, of which there are copies for consignors, consignees, and the carriers themselves. The documents related to and normally filed with the bill of lading are varied and often voluminous. These may consist of shortage and demurrage reports, invoices, and other information which documents the transaction. Included are records relating to the shipment of household effects, authorized by law and regulations for military personnel and for civilian employees of the Government. Agencies shipping certain valuables under the Government Losses in Shipment Act, which insures against loss, retain copies of schedules of material shipped, documents relating to claims which may ensue, and other pertinent records.

#### Movement of Personnel

These records include copies of travel orders, authorizing travel and subsequent payment, and standard form vouchers showing payment for official travel. These records are covered under Schedule 9.

All records described in this schedule are authorized for disposal in both hard copy and electronic forms, as provided for under NASA Schedule 2 and NASA Schedule 10, Records Common to Most Offices.

### PROGRAM FORMULATION RECORDS [SEE NOTE2]

This records schedule is one of a series of schedules, approved by the Archivist of the United States, which furnishes authoritative instructions for the retention, destruction, or retirement of records held by NASA Centers or other offices. This schedule grants continuing authority for the disposition of records already accumulated or to be accumulated in the future.

The records described in Schedule 7 pertain to the management, planning, and administration of a Research & Development (R&D) program and to groups of projects and laboratory type organizations at Centers. Records in this category are created and accumulated by organizations that have overall management responsibility for programs or multiple-project activities. This schedule provides pertinent record categories and specifies the retention and dispositions for each.

Files relate to overall program administration and reflect planning, budgeting, scheduling, coordination, and management of the program. Files accumulated by offices of project managers who are responsible for the direct administration of the technical aspects of the program/system, should file these as part of the R&D Project Case File which is set forth in Schedule 8 - "Program Management." (SEE NOTE1)

The Program Office, normally at NASA Headquarters, is responsible for maintaining the administrative case file relating to a particular program/project, and for insuring the ongoing consolidation of essential documentation of the program. This activity includes records from time of inception, management of the program throughout its life, to program completion. Official records created during project/program management through to completion of the project are filed in the official R&D Project Case File located in Schedule 8.

**NOTE1:** PROJECT MANAGEMENT and PERFORMANCE RECORDS of an R&D Program are described in Schedule 8 which covers records created and accumulated by project organizations that have direct management control over in-house and/or contractor project activities. These files include individual basic research, applied research, and engineering development projects and as such are designated as either the project/program manager's files or the principal investigator's files and are considered a "PERMANENT" record series.

**NOTE2:** There are no General Records Schedules (GRS) that cover R&D records. Therefore, if a category or series of records is not listed in this Schedule or Schedule 8, disposition is not authorized. Contact your Center's Records Manager or the Nasa Records Officer for instructions.

## Chapter 8. NRRS 8

### PROGRAM MANAGEMENT RECORDS

This records schedule is one of a series of schedules, approved by the Archivist of the United States, which furnishes authoritative instructions for the retention, destruction, or retirement of records held by NASA Centers or other offices. This schedule grants continuing authority for the disposition of records already accumulated or to be accumulated in the future.

The records described in Schedule 8 pertain to the management and operation of NASA construction of facilities, architectural, and engineering design records. These records relate to the functions that create, control, formulate and prescribe real or personal property or facilities management policies and procedures used by activities and offices applying these procedures. Records also included in this series/schedule are Research & Development (R&D) records that pertain to the management, operation, and performance of an R&D Project. Such records are created and accumulated by project organizations that have direct management control of in-house and/or contractor project activities. Project files relate to basic and applied research, and engineering development projects. The Project Office, normally at the laboratory or division level at a field installation, is responsible for maintaining the official files, and is designated as the Office of Primary Responsibility (OPR). This office is responsible for maintaining the files relating to a particular project and for insuring the ongoing collection and consolidation of essential documentation for the project. When more than one laboratory at an installation or more than one installation works on a project, the lead project manager should establish procedures to insure that all files relating to the project are collected at a single designated location for retirement and transfer.

### **INSTRUCTIONS FOR DESIGN AND CONSTRUCTION FILES:**

General Definitions and Guidelines to use with Design and Construction Files: Generally, drawings pertaining to the design process lose their administrative usefulness after the final construction plans are accepted; these records should be considered inactive after the completion of the construction project. Precise measured drawings, which are used during the construction process, have a continuing value during the life of the structure, especially for repair and maintenance projects. The original construction drawings as well as repair and alteration drawings (or microform copies) should be considered active while the structure is still used, maintained or owned by the Federal Government.

### **DEFINITIONS:**

Preliminary Drawings: Drawings and sketches that are conceptual in nature. These drawings are usually freehand studies that show the basic design of the structure, include the arrangement of rooms, general appearance of elevations and floor plans, as well as other details under consideration.

Models: Three dimensional, reduced-scale models which are prepared for illustrative or presentation purposes.

Intermediate and Pre-final Drawings: Drawings which are created and reviewed in preparation of the final working drawings.

"As Built" Drawings: Annotated copies of final working drawings or additional drawings which show changes in the initial construction from the original design.

Shop Drawings: Detailed drawings prepared by construction contractors or subcontractors of particular parts of the building which they are to supply or by manufacturers of products to be assembled in their shops. These drawings which include plans for architectural embellishments and interior design such as tile and marble work, special cabinet work, elevators, or heating systems, not only provide instructions for assembling the products on the job site, but may also be necessary for future repair and preservation projects.

Repair and Alteration Drawings: Original drawings which depict repairs and alterations to the building as it was originally constructed.

Contract Drawings: Copies of the original workings on which contract negotiations are based.

**Standard Drawings:** Final drawings for standard details and other documents created in their preparation.

**Space Assignment Plan(s):** Drawings which depict outline floor plans used for space assignments.

## CHAPTER 9. NRRS 9

### Financial Management And Inspector General Records

This records schedule is one of a series of schedules, approved by the Archivist of the United States, which furnishes authoritative instructions for the retention, destruction, or retirement of records held by NASA Centers or other offices.

This schedule grants continuing authority for the disposition of records already accumulated or to be accumulated in the future.

#### Financial Management

The records described in Schedule 9 pertain to the management and operation of NASA accountable officer's accounts, including records under the cognizance of the General Accounting Office (GAO). These records relate to documentation concerned with accounting for availability and status of public funds. There are several types of accountable officers' returns and related records, such as (a) the collecting officer, who receives monies owed to the Federal Government and ensures that it is credited to the proper account; (b) the disbursing officer who is responsible for providing documentation to GAO since he accomplishes the actual payment of public monies to proper Federal creditors; and, (c) the certifying officer, whose signature on a summary attests to the authenticity of vouchers listed on the schedule.

Disbursements for most civilian Government agencies are made by the Chief Disbursing Officer of the Treasury, who heads the Division of Disbursement of the Bureau of Government Financial Operations within the Department of the Treasury. Since July 1949, disbursements have been made for most Agencies on the basis of certified schedules, with the detailed vouchers transferred to GAO from the Agency or held in Agency space if site audit was involved. This procedure was extended and confirmed by GAO General Regulations, No. 115 issued January 29, 1952, which promulgated a standard form voucher and schedule of payments (Standard Forms 1166 and 1167) for use by all Agencies effective July 1, 1952, and formally eliminated the transfer of vouchers of the Chief Disbursing Officer.

This schedule includes records held for onsite audit by GAO, as described in item 1a below. Under onsite audit, vouchers, contracts, schedules, statements of transactions and accountability and other related supporting documents are retained in Agency space for GAO auditors.

#### Inspector General

Records in this series monitor agency program and operations to prevent and reduce waste and fraud and to improve Agency Management. The Inspector General Act of 1978, as amended, and other legislation established an Office of Inspector General (OIG) in selected Government Agencies. An OIG conducts and supervises audits and investigations; recommends policies to promote economy, efficiency, and effectiveness and to prevent fraud and abuse; and reports problems, deficiencies and progress to the Agency head. OIGs must submit reports to Congress.

This schedule covers the two major series of disposal investigative, audit and related records created or maintained by an OIG. Indexes to these files are covered by NASA Records Schedule 10 - Records Common to Most Offices. Correspondence or subject files, policy files, publications, reports to Congress, and any other records not specifically described in this schedule must be scheduled through the Center Records Manager. This schedule does not authorize disposal of investigative case files for cases that result in national media attention, Congressional investigation, or substantive changes in Agency policy or procedures. Such files must be scheduled by submission of a NASA Form 1418.

Records described in this schedule are authorized for disposal in both hard copy and electronic forms.

# Appendix A. Glossary

## Accountable Officers' Accounts

Specific documents supporting disbursements or collections of money prepared by Accountable Officers and required by GAO to be maintained for audit.

### ACTIVE RECORDS

Records that are referred to on a frequent basis, i.e., daily, or weekly. Records that are maintained in office files for immediate access, use, and reference. Also considered current records, which are necessary for conducting the business of an office.

### APPRAISAL

The process of determining the value and, thus, the disposition of records based upon their administrative and other uses, their evidential and informational or research value, their arrangement, and their relationship to other records.

### BLOCKING FILES/RECORD SERIES

(1) One or more chronological segments of records that are in the same series and are dealt with as a unit for disposition purposes, especially during the transfer of permanent records to NARA. For example, a transfer of records in 5 year blocks.

(2) In electronic records, a grouping of data stored as a unit on an external storage medium and dealt with as a unit by the computer of input or output.

(3) The records of an Agency, organizational component, or functional area.

### CASE FILE

A folder or other file unit containing materials relating to a specific action, transaction, event, person, place, project, or other subject. A case file may cover one or many subjects that relate to the case; for example, a contract file contains records on a specific contract, such as the application, correspondence, addenda, reports, and processing documents. Other types of case files include official personnel folders, surveys, and studies.

### CORRESPONDENCE

Records arranged and filed according to their general informational content. Consist mainly of general correspondence but may also include forms, reports, and other material that relate to programs and functions not to a specific case or a particular person or organization. See GENERAL CORRESPONDENCE.

### DESTROYING

Physical destruction or alienation of records; any act which effectively obliterates the informational content of records, such as unauthorized removal of Government documents, tearing up, burning, pulping, erasure (tapes/diskettes/disks).

### DISPOSITION

Actions taken with regard to noncurrent records. The actions include retirement to a records center for temporary storage, transfer to NARA, donation to an eligible depository, reproduction on microfilm, and destruction. Disposition may include two or more of these actions, such as retirement after 1 year to a records center, with retention for 5 years and destroy when 6 years old.

### EVIDENTIAL VALUE

The usefulness of records as the primary evidence of NASA's authority, functions, organization, operations, and basic decisions and procedures.

**FEDERAL RECORDS CENTER (FRC)**

A records storage facility operated by the National Archives and Records Administration (NARA) for housing and servicing inactive and semiactive records of the Federal Government.

**FILE**

- (1) An accumulation of records maintained in a predetermined physical arrangement.
- (2) Storage equipment such as a filing cabinet.

**FILE BREAK**

Termination of a file at regular periodic intervals to facilitate continuous disposal, retirement, or transfer of the file/record series, i.e., monthly, yearly, 5 year blocks.

**GENERAL CORRESPONDENCE**

A file consisting of correspondence accumulated by organizations as a result of their routine operations. Records consist of arrangement of correspondence, memoranda, and messages on a number of different subjects as distinguished from a case file that contains correspondence about specific transactions or projects.

**GENERAL RECORDS SCHEDULES (GRS)**

A comprehensive listing of temporary records common to several or all Federal agencies, issued by NARA, governing the disposition of specified recurring series of records. These standards are mandatory for Federal Agencies.

**INACTIVE RECORDS**

Records that are no longer required or which are referred to so infrequently in the conduct of current business that they may be removed from the office and either retired to an FRC or destroyed depending on the approved disposition. Also referred to as NONCURRENT RECORDS.

**INVENTORY**

A systematic listing of all records series in an office or an agency generally including the location of each series, physical characteristics, and description of content.

**OFFICE OF PRIMARY RESPONSIBILITY (OPR)****OFFICE OF RECORD**

An office designated as the official custodian of records for a specified program, activity, or transaction of an organization.

Under functional or decentralized filing plans, the Office of Record or OPR is usually the office which created the record or initiated the action on an incoming records, unless otherwise designated.

Under centralized filing, the central file(s) are designated or become the OPR.

**OFFICIAL FILES**

The official files include the originals of incoming correspondence and the initialed copies of the outgoing and interoffice correspondence, the original or action copies of reports, completed forms, maps, photographs, and other similar documents.

#### PERMANENT RECORDS

In U.S. Government usage, records appraised by NARA as having enduring value because they document the organization and functions of the agency that created or received them; and/or, because they contain significant information on persons, things, problems, programs, projects, and conditions with which the agency dealt. These records are valuable or unique in that they document the history of the agency and generally record primary missions, functions, responsibilities and significant experiences or accomplishments of the agency.

#### PROJECT FILE

A type of case file that contains records relating to an assigned task or problem. Also see CASE FILE.

#### RECORD GROUP NUMBER

An identification number assigned to a single Federal agency by GSA or NARA for archival control of that agency's documentation/records. NASA has been officially assigned a Record Group Number of 255.

#### RECORDS

All books, papers, maps, photographs, negatives, machine readable materials, diskettes, microfilm, audio tapes, or other documentary materials, regardless of physical form or characteristics, made or received by an agency of the U.S. Government under Federal law or in connection with the transaction of public business and preserved or appropriate for preservation by that agency or its legitimate successor as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the Government or because of the informational value of the data contained therein. Library and museum material made or acquired and preserved solely for reference or exhibition purposes, extra copies of documents preserved only for convenience of reference, and stocks of publications and or processed documents are not included.

Machine readable materials include, but are not limited to, optical disk, magnetic tape, sound recordings, microforms, and any other such recording medium regardless of how produced.

#### RECORDS CENTER

(1) A facility for the economical storage and servicing of records pending their ultimate disposition.

(2) An area or facility designated as a temporary staging area.

Also see "FEDERAL RECORDS CENTER."

#### RECORDS RETENTION SCHEDULES

A legal document governing, on a continuing basis, the mandatory disposition of recurring record series of an organization or agency. Also known as a records schedule, records control schedule, records disposition schedule, retention schedule, or schedules. NASA's schedules are formally called NASA Records Retention Schedules (NRRS).

#### RETENTION PERIOD

The period of time that inactive records must be kept after cutoff or break, prior to their destruction.

#### RETIREMENT

The shipment of semicurrent and noncurrent records to a records center or some other authorized depository for storage until the expiration of their retention period.

#### SCHEDULE

An official agency action document listing the records series created by the agency. A schedule indicates whether each series of records is permanent or temporary and includes retention periods. Also see RECORDS RETENTION SCHEDULES.

#### SERIES

File units or documents arranged in accordance with a filing system or maintained as a unit because they relate to a particular subject or function, result from the same activity, have a particular form, or because of some other

relationship arising out of their creation, receipt, or use. Sometimes known as a "record series."

#### TEMPORARY RECORDS

Records approved by NARA or by an authorized agency records schedule for disposal, either immediately or after a specified period of time. Also called disposable records or nonpermanent records.

#### TRANSFER

The movement of records out of filing cabinets and office space into the legal custody of NARA or other authorized depository.

#### TRANSITORY RECORDS

A general term for those types of records that lose their value within a short period of time (approximately 3 months) and that should be separated during filing from records requiring longer retention or until the purpose for which it was created has been accomplished and the record can be destroyed.

#### VITAL RECORDS

Records essential for maintaining the continuity of Federal Government activities during a national emergency. These records consist of two categories: (1) emergency operating records, which outline the essential functions of the Government for the duration of emergency conditions, and (2) rights and interests records, which are required for the preservation of the rights and interests of individual citizens and the Government. (See NPD 1440.6 NASA Records Management.)

#### WORKING PAPERS

Documents such as rough notes, calculations, or drafts, assembled or created and used in the preparation or analysis of other documents.
